ELIS SEIS- PO Modeling Report (DRAFT2) (12Aug14)cooopreview.pdf

Thank goodness..PHEWWWWW

please please please look at it ... critically...

I am especially interested in hearing comments on how the two documents flow together (or do not)..
And if you walk away from the reports feeling that we have done our due diligence in modeling /estimating sediment transport in eastern LIS to be sure that disposal sites (should they or it be designated is in the best possible location).

Thanks (will send this again to the entire corps group thanks!

Caveats: NONE

I have a fair amount of time available next week. After that September will be pretty busy with travel, but I'll be able to shoehorn things in.

Tom

Hi tom,

The phys o Modeling report and data reports are ready for outside review.

I am counting on you to pick them apart and make sure that they can be defended.

I am planning to send them out today (they do not include LTFATE and STFATE) which will happen early next month.

Are you available for review the next few weeks? PS I will be sending an all coop agency message later today and separate message to your folks

Re: Availability

Week of 21 July does not work for me.
Other weeks are currently OK, but vacation plans are still in flux.

Thanks,
Tom

Subject: [EXTERNAL] RE: elis seis review schedule

Reminder: YOU FOLKS HAVE REVIEWED A DRAFT VERSION OF THIS BIOL. REPORT IN May.

Hi Cathy,

In response to your question regarding a schedule,

I have outlined a review schedule below.

Best estimate for the Aug schedule

July:

1) Biological Characterization - this went out to cooperating agency reps. USACOE had already completed a fatal flaw review and comments were incorporated. EPA is not expecting Corps personnel to complete another review.

2) Phys O report and modeling - This will be sent out the week of July 7th (date not confirmed).

EPA is expecting a full review of the report and modeling (tom and steve especially) and input at the next cooperating agency meeting via webinar (mid July)

*** this is really important, I am hoping to get a lot of input/assistance from you on the phys o and modeling

August:

1) review of powerpoint presentation for 2nd summer cooperating agency meeting to discuss next steps

2) review of draft chapters of EIS (intro chapters 1,2,7)

3) review of documentation provided on screening, final analysis.

4) Probably have a planning meeting at your office to discuss next steps/tech assistance/nepa .

Sept:

- 1) review of presentations for public meetings to be held in the fall
- 2) review of presentations/documentation for additional meetings
- 3) at least 1 planning meeting to discuss alternatives (at Corps office) -to be confirmed. ** same here, looking for input/NEPA assistance needed..

Hope this helps. I probably should expect another round of invoices in August?
